

## INGLES 6° AÑO - EESTN°1

Hola a todos! Bienvenidos nuevamente! Espero que en este periodo de receso hayan podido descansar y cargarse de energía para comenzar esta segunda etapa. A continuación les detallare algunos puntos a tener en cuenta:

- Por cuestiones de organización, las actividades las enviaron a un **nuevo mail:** [teacherfloreniabooveris@hotmail.com](mailto:teacherfloreniabooveris@hotmail.com) (solo algunos casos puntuales las enviaron al whatsapp)
- Enviar las actividades en lo posible en formato foto (no Word) para facilitar la corrección y siempre indicar nombre apellido curso y escuela.
- Utilizar lapicera o un lápiz bien oscuro para resolver las actividades y chequear que las fotos estén legibles
- Pueden hacerme consultas o aclarar dudas en horario escolar al whatsapp (03364606831)

### Trabajo n°8

**Fecha de entrega: 17 de agosto**

**Enviar al mail: [teacherfloreniabooveris@hotmail.com](mailto:teacherfloreniabooveris@hotmail.com)**

### READING COMPREHENSION

#### 1) Lee el texto

# THE UNIVERSE

### Home Sweet Home

The Earth is our home, and we have been exploring it for thousands of years. Human beings have been to every part of the six continents. We have climbed the highest mountains, crossed the hottest deserts and studied the coldest places. We seem to know almost everything about our planet. But what about the other planets in our solar system?

### The Universe

Since the 1950s, people have been travelling beyond Earth into space. In 1969, Neil Armstrong stepped onto the Moon. Since then, we have been sending space probes to the planets and into outer space. These probes have been sending us data, and scientists have been studying them and learning new facts about the universe. The giant Hubble telescope in space has also been sending back amazing photographs of the rings of Saturn and the sixteen moons of Jupiter.

### Are We Alone in the Universe?

Scientists have also been searching for other solar systems, and they have found at least one. They have discovered three planets in orbit round a star called Upsilon Andromedae in another galaxy. It is many light years\* from Earth, but you can see it in the night sky with the naked eye. The discovery of these planets has caused great excitement. It means that there may be other forms of life in the universe.

\*A light year is the distance light travels in one year, about 9,500,000,000,000 km.

**2- Relee el texto y escribe True (verdadero) o False(falso). Justifica las oraciones falsas.**

1. Human beings haven't explored the Earth yet
2. People's first expedition to space was in 1969.
3. The giant Hubble telescope takes photographs in space.
4. Scientists didn't find another solar system.
5. Upsilon andromedae is a star.

**3- Responde estas preguntas sobre el texto**

1. Which planets are mentioned in the text?
2. What have we seen with the Hubble telescope?
3. Is Upsilon Andromedae a star or a galaxy?
4. Can we see Upsilon Andromedae without a telescope?
5. Why is the discovery of planets in another galaxy exciting?

**4- Look up the words you don't know in the dictionary**

(Busca las palabras que no conoces en el diccionario)

**5- Observa el texto detenidamente...¿ Qué tiempo verbal puedes encontrar en el texto?  
Marca con una X**

Present simple

Present continuous

Past simple

Past continuous

Present perfect

Future

¿Encontraste algún tiempo verbal que no conoces? ¿Cuál es? Escribe una oración del texto
